

Figure 1. Oxalate assay standard curve

Figure 2

Figure 3

Figure 4

Figure 5

Figure 6

Figure 7

Average alpha amylase produced by WT2 and by the 34 mutants in function of their oxalate production

Oxalate deficient mutant  
used as oxalate deficient  
host for the expression of several enzymes

Parental strain

used as control host for the  
expression of several  
enzymes

Figure 8:  
OAH activity detected in WT1, WT2 and in three mutants

Figure 14:

A. *oryzae* PLA1 production in WT1 and in FINAL strains during shakeflask fermentations. Transformants were grown in shakeflasks and PLA1 activity was determined at the indicated timepoints. Estimated copynumber of the PLA1 expressionunit is depicted between brackets.
